ROPELLA INDUSTRY EXPERTISE

The Biochemical industry uses bioprocesses and biomass to replace petroleum products as key building blocks for a variety of industries including; medicine, nutrition, agriculture, cosmetics, and even forensic investigations. Currently the production is primarily focused on utilizing enzymes, biocatalysis and fermentation. As biofuels rise in prominence, scientists are searching for new and better ways to produce biochemicals as by-products of these processes. There is also promise in the field of agricultural production and harvesting biochemicals from crops and algae.

Ropella's mission is to build lasting relationships between High Potential A-Player Talent, Backable CEO's, Board Members, SME's and Transformational Leaders. Our primary goal; providing ROI value towards growing the great companies we invest our time, talent and treasure into.

Building teams worldwide, in all functional areas and at all levels, with the best possible talent is one of the highest priorities for transformational leaders – because we all know – **the Team with the Best Talent Wins** Especially so, in fast growing organizations.
