ROPELLA INDUSTRY EXPERTISE

Green chemistry is a branch of science which looks to stop pollution at its source — preventing the generation and use of hazardous substances rather than trying to treat or clean them up after the fact. These procedures, which value quality and purity over expediency, can be applied to nearly every segment of commercial industry, from biodiesel to all natural cosmeceuticals. Green chemists design safer, degradable chemicals and products, and processes that maximize the use of raw materials while reducing or eliminating the need for potentially toxic chemicals.

Ropella's mission is to build lasting relationships between High Potential A-Player Talent, Backable CEO's, Board Members, SME's and Transformational Leaders. Our primary goal; providing ROI value towards growing the great companies we invest our time, talent and treasure into.

Building teams worldwide, in all functional areas and at all levels, with the best possible talent is one of the highest priorities for transformational leaders – because we all know – **the Team with the Best Talent Wins** Especially so, in fast growing organizations.

OUR SOLUTIONS

With over 35 years as a global search leader, delivering the Most Advanced Search Execution Capabilities, Ropella has proven many times over, to be extremely well-versed at solving the most challenging "needle in a haystack" searches. While at the same time managing Talent Selection & Development as a Primary Asset for ROI.

As a bestselling author of *The Right Hire* and a highly experienced practitioner, Patrick Ropella developed the **SMART Search System**®, regarded as one of the most well respected, Talent Centric Executive Search Solutions available.
